*40 pieces in 5 minutes*

1

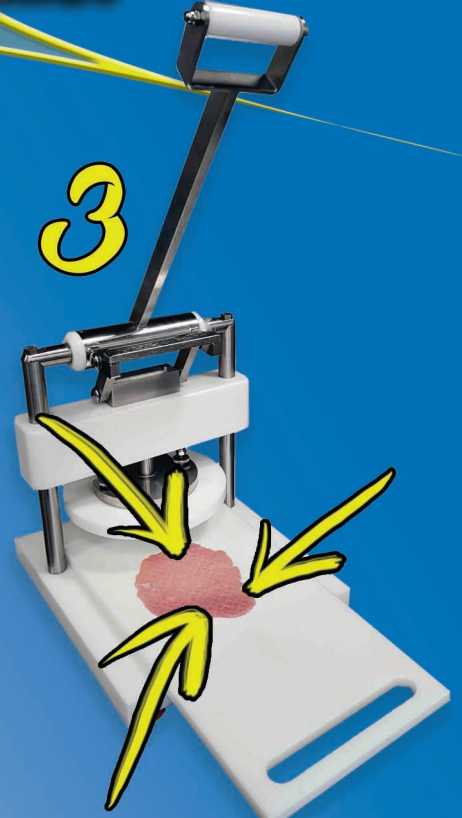

*Place the meat*

2

*Flatten*

3

*Pick-up the meat*

The Tender Star Tender Press allows you to flatten all kinds of meat quickly with a minimum of effort. Just place a piece of meat on the board, and lower the control arm to flatten the desired piece. In addition you can choose between 2 different types of plates a smooth plate for delicate meat like poultry, and a grooved plate for meat like beef, pork, etc. The tedious tasks and the hard pieces cut with the slicer are definitely part of the past. The Tender Press flattener replaces so ideally the bat or the tenderizing and the meat slicer. In addition, it is entirely built from stainless steel and POM. All parts in contact with the meat can be disassembled very quickly without tools to be sterilized.

### Technical data :

Height: 800mm.  
Width: 400mm.  
Depth: 450mm.  
Weight: ±30kg.  
Passage height: 70mm.  
Height adjustment: 0 to 10mm.  
Press plate diameter: 280mm.  
plate: 600mm. x 400mm.  
Number of pieces per minute: ±8.
